**TEST**

91665(X)  STRATIFY JCV® Antibody ELISA w/ Reflex to Inhibition Assay

Offered for multiple sclerosis patients only.  
The JC Virus (JCV) is associated with progressive multifocal leukoencephalopathy (PML). Detection of antibodies to JCV in serum or plasma is a reliable indicator of exposure to JCV. The analytical performance characteristics were determined for multiple sclerosis patients.  
Do Not use this Form to order any other tests; use a separate requisition.

Visit [QuestDiagnostics.com](http://QuestDiagnostics.com) to:

- Schedule an appointment (or call 888-277-8772)
- Find Quest Diagnostics locations (or call 800-377-8448)

*Walk-in patients are always welcome*

**UVMHC Test Code: SJC**
